Stow company awarded “Manufacturer of the Year”

Representative Kate Hogan (right) presents a “Manufacturer of the Year” award to Chuck Faraci, Director of Operations for CPI Radant Technologies, at the State House on October 24th.

Representative Kate Hogan recently presented a “Manufacturer of the Year” award to CPI Radant Technologies, of Stow, during the 2nd Annual Manufacturing Awards Ceremony at the State House. Hosted by the Legislative Manufacturing Caucus, this ceremony honors manufacturers from every legislative district that stand out as an employer, an innovator, and a model in business; Rep. Kate Hogan nominated CPI Radant Technologies to receive the award. CPI Radant Technologies has been serving the aerospace, defense and commercial industries since 1979 and is a supplier for many major aerospace and defense contractors, small companies and government agencies.

Manufacturing output in Massachusetts is at its highest level in history, and accounts for more than 11 percent of the state’s economy.

“Manufacturers in Massachusetts create high-quality, high-value goods, and are at the forefront of adopting new technology and innovative production techniques,” said Housing and Economic Development Secretary Jay Ash. “Our administration is eager to continue working with employers, educational institutions and workforce development organizations to create a highly-skilled workforce, and partner with our colleagues in the legislature to support this critical industry.”

Rep. Kate Hogan is a member of the Legislative Manufacturing Caucus, which aims to increase Massachusetts’ competitiveness in manufacturing by providing legislative support. The Caucus includes more than 60 legislators from around the Commonwealth and focuses on providing training opportunities for manufacturing employees, encouraging innovation by helping start-ups access resources, and expanding apprenticeship opportunities in key manufacturing sectors.
